67 Years of Experience

A Brand Producing for the World Since 1958

"It all started in a workshop producing fruit presses."

Since the very first day we were founded, we have grown with our family values and continued to produce with unwavering dedication to our work. Today, in our 6,500 m² production facility, we create industrial kitchen solutions for professionals around the world.

Thanks to our advanced production infrastructure, strong R&D, and commitment to quality, we have become a trusted brand in the industry, exporting to more than 60 countries today.

Every day, we continue working to produce better, reach more regions, and become the most reliable partner for professionals in the kitchen.

60+ COUNTRIES

We directly export 50% of our production to five continents. With our global distributor network and deep understanding of local markets, we offer solutions tailored to each country.

QUALITY

All our production processes are managed in accordance with ISO standards. The use of recyclable materials, long-lasting product design and low energy consumption are among our core principles.

R&D AND INNOVATION

With our engineering infrastructure and the feedback we receive from users, we develop next-generation products every year.

Cancan Quality

The Same Quality in Every Product

"Since 1958, with three generations of production experience, quality is not a goal for us; it is a responsibility."

At Cancan®, we carry out every stage of production entirely in-house, under 100% control. From design to assembly, from welding processes to quality control tests, all steps are executed by our expert teams. Every product is manufactured in-house through advanced production processes, in line with international quality standards.

In our production approach, we think not only about today but also about the future. That's why we prioritize R&D, analyzing customer needs and industry trends to develop innovative solutions. Every one of our products reaches the end user precisely tested and fully compliant with international quality standards.

JUICING EQUIPMENT

Juicing Equipment

Manuel Fruit Juicers

Manual Fruit Presses are designed for cafés, buffets, restaurants, and businesses looking to add fresh juice to their menus by efficiently squeezing citrus fruits such as oranges, pomegranates, lemons and grapefruits. With an ergonomic structure and NSF-certified food safety compliance, they fully meet hygiene and health standards. These manual presses deliver high performance with a two-stage squeezing system and feature stainless steel strainers that are removable and dishwasher-safe, ensuring low pulp output and a clean, efficient pressing process. A non-slip plastic base provides safe operation. This design is compatible with all types of citrus fruits, offering businesses both maximum efficiency and convenience.

0103

Pomegranate Type Manual Fruit Juicer

Equipped with a locking strainer and bowl, the Pomegranate Type Manual Fruit Juicer is designed with a larger top press diameter (11.5 cm) to make squeezing large pomegranates easier. It offers high efficiency with a squeezing force of 90 kg. Its drip cup prevents juice from leaking during squeezing. The support handle is designed for ease of use when pressing. It is developed for use in places such as cafes, buffets, and restaurants.

Juicing Equipment

Automatic Orange Juicers

Automatic Orange Juicers are ideal for quickly and efficiently squeezing citrus fruits such as oranges and lemons in hotels, restaurants, hospitals, commercial centers, shopping malls, dormitories, universities, and juice bars. With a single button, they automatically perform the feeding, cutting, and squeezing processes. Cancan® Juicers can squeeze 28 or 38 oranges per minute. With glass serving, self-service, storage tank, and refrigerated models, they meet various needs and offer flexibility with stand and bottle holder accessories. The squeezing process occurs hands-free, ensuring guaranteed hygiene. The Automatic Orange Juicer system prevents contact between the juice and the peel, stopping the acid from the orange peel from mixing into the juice. This results in high-quality, flavorful juice.

Automatic Orange Juicers

TECHNICAL COMPARISON CHART

The CANCAN® Automatic orange juicers are designed to extract citrus fruits such as oranges, mandarins and lemons in public places such as hotels, restaurants, commercial centers, entertainment and shopping centers, dormitories, universities, snack bars, etc.

38 with Glass Automatic Orange Juicer

The 38 With Glass Automatic Orange Juicer is designed for businesses to efficiently squeeze citrus fruits such as oranges and lemons. With just one button, it automatically performs the feeding, cutting, and squeezing processes. Cancan's technology ensures that the juice and the peel do not come into contact, preventing peel acids from entering the juice and preserving its flavor. The machine features a stainless steel body, a rotating disc, and a self-cleaning system. Its hygienic juice extraction system offers guaranteed hygiene by operating hands-free. It also includes a 15 kg fruit storage chamber and provides a practical, user-friendly design for businesses.

-  Fruit Storage Basket: 15 kg or 28 kg (Optional)

38 Cooler Model Automatic Orange Juicer

The 38 Cooler Model Automatic Orange Juicer, equipped with a bottom cooling system, is designed to quickly squeeze citrus fruits such as oranges and lemons in supermarkets and markets. The 6-minute cooling feature ensures that the juice is kept evenly cool until the last drop, while the stainless steel structure guarantees hygiene by preventing contact between the orange juice and external surfaces. The system collects peel waste directly into the waste can. Its fully stainless steel body, strengthened mobile stand, and lockable wheels provide practical, safe, and flexible use.

Juicing Equipment

Automatic Pomegranate Juicers

Automatic Pomegranate Press is a professional machine designed to quickly, efficiently, and effortlessly squeeze all types of citrus fruits, especially pomegranates. This model eliminates the difficulties of manually squeezing hard-shelled citrus like pomegranates, providing hygienic and high-efficiency juicing while preserving nutritional value. It is ideal for high-usage businesses such as cafes and restaurants. One of its most important advantages is its ability to squeeze different citrus fruits such as oranges, pomegranates, and lemons simultaneously. Thanks to this feature, it offers great practicality for businesses that want to prepare mixed fruit juices. Additionally, its easy-to-clean design makes it user-friendly.

0603

Automatic Pomegranate Press

The award-winning Automatic Pomegranate Press is designed for use in hotels, restaurants, commercial centers, entertainment venues, shopping malls, student dormitories, universities, and juice buffets. One of its most important advantages is its ability to squeeze a wide variety of fruits with a single machine. Thanks to its hydraulic pressing system, it can easily squeeze pomegranates, oranges, grapefruits and lemons providing hygienic, high-efficiency juicing. The double filtering system ensures that pulp does not mix into the juice. Its compact stainless steel body and easily removable parts make cleaning practical and easy.

- 8-Second Squeezing
- Mixed Fruit Squeezing
- Double Filter For Lower Pulp
- Safety Switch Cover
- Spare Top Strainer
- IP Certified Control Button
- Easy Cleaning

PREPARATION EQUIPMENT

Preparation Equipments **Cutters & Slicers**

CANCAN® Preparation Equipment enables fast, safe, and hygienic operations such as slicing, chopping, peeling, and can opening in professional kitchens. Thanks to their stainless steel bodies, these machines offer long-lasting use and fully meet hygiene standards with their easy-to-clean design. Their ergonomic structures reduce labor effort in the kitchen, while specially designed blades deliver fast, uniform, and aesthetically pleasing cuts. With both manual and pneumatic model options, they adapt to kitchens of various scales, making preparation processes practical, efficient, and effortless.

1301

Vegetable-Fruit Cutter

Designed for industrial kitchens, the Vegetable-Fruit Cutter ensures fast and precise slicing while preserving the freshness of vegetables with its sturdy body and high-quality stainless steel blades. With interchangeable blade systems, it offers three different cutting sizes, allowing quick setup and easy cleaning. Its special handle mechanism enables products to be sliced with minimal force, while the pusher block ensures uniform cuts without crushing the product. The manual locking pin increases safety before use.

Pneumatic Pineapple Peeler with Stand

The Pneumatic Pineapple Peeling Machine simplifies the time- and labor-intensive pineapple peeling process with an advanced air pressure system. This innovative solution provides fast and consistent peeling performance, saving both time and labor costs. Thanks to its pneumatic technology, which adapts to the shape and size of the fruit, each pineapple is perfectly peeled every time. From large-scale production facilities to catering operations, it offers exceptional efficiency and high productivity with less workforce. Its brake-equipped wheels on the portable mobile stand make it easy to move the unit.

Preparation Equipments

Electrical & Manual Can Openers

CANCAN® Can Openers offer safe and fast use in kitchens with their durable structure and ergonomic design. Thanks to their stainless steel materials, they provide long-lasting performance and fully comply with hygiene standards. With both manual and electric models, CANCAN® offers solutions for various needs, catering to a wide range of applications from industrial kitchens to catering services. Their easy-to-use mechanisms reduce workload, making preparation processes more efficient and practical.

0302

Professional Type Manual Can Opener

The professional type manual can opener provides great convenience to users by safely and hygienically opening cans, whether large or small, in places such as professional catering, industrial kitchens, hospitals, and cafeterias.

WASHING EQUIPMENT

Washing Equipment Pre-Rinse Faucets

CANCAN® Washing Equipments are designed for maximum hygiene and efficiency in industrial kitchens. With their stainless-steel construction, they offer long-lasting use while their ergonomic designs speed up workflows and ensure water savings. Offering both compact and large-capacity models for various kitchen needs, they make it easy to hygienically clean vegetables, fruits, and kitchen equipment. With CANCAN®, washing processes become cleaner, more practical, and safer.

Washing Equipment
Sink Mount Pot Filler

0511

Sink Mount Pot Filler

The Sink Mount Pot Filler is designed to quickly fill large pots in industrial kitchens without needing to lift them off the stove. Made from 304 stainless steel, it features a 180° rotating dual-jointed arm and a ceramic cartridge valve that opens and closes with a quarter turn, providing maximum hygiene, durability, and user comfort. It connects only to the cold water line; its high flow rate increases service speed, while the ergonomic handle allows precise control of water flow at the point of use.

Washing Equipment Industrial Type Pot Washing Machine

1001

Industrial Type Pot Washing Machine

Industrial Type Pot Washing Machine cleans dirt and grease stuck on pots, pans, and cauldrons in industrial kitchens effortlessly and hands-free using its rotating washing or polishing brush. It can be either permanently mounted to a pot washing sink or used as a mobile unit with its special wheeled cart. The washing brush provides deep cleaning with hot water, while the polishing brush easily removes tarnish and burn marks. Its oil-pressure-driven motor system protects the user from electrical hazards, making it an indispensable hygiene solution in kitchens.
